Task 3

Greetings, Participants of Hologlyph Bots! 🥳

A big round of applause for completing Stage 1 of the competition! 🎉 We hope that it has been a valuable learning experience, and are all set to embark on an exciting journey in Stage 2.

We're now progressing to Task 3, which includes the following subtasks:

- **Task 3A - Bot Design** : This sub task involves CAD Modelling and Circuit Design of your bot. It is also an opportunity to dive into the creative process of designing your own bot. You'll have the chance to put your CAD Modelling and Circuit Designing skills to the test by desiging bots unique to your team.

- **Task 3B - Arena Setup** : This sub task involves flex printing and overhead camera setup.

- **Task 3C - Hardware Testing**

So, get ready for this exciting phase of the Hologlyph Bots!!

Those who are **not eligible** for **free hardware kits** can check the Hardware Procurement Page and start buying the components.
